Elyria, Ohio –January 25, 2017 – Effective today a new channel has been created called Royal Medical Supplies to offer diabetic meters, strips, lancing devices and complementary medical products.

Our mission is to support the Independent Pharmacy and Durable Medical Equipment (DME) channel in a wholesale capacity through a variety of innovative programs that support the LTC, individual patient, and cash diabetic segments. We will also support any diabetics that require assistance with their diabetic supplies.

We will provide high quality glucometers and strips for LTC and individual patient use along with our new Pain Management Lancing Device. All of our glucometers are FDA approved and meet the improved accuracy standards per ISO 15197 with our GDH-FAD strip technology.

“This Royal Medical Wholesale channel will position our clients and put them into a competitive position in executing our Independent Pharmacy Network, Long-Term Care, Managed Care, and Hospital Systems,” says Donald Chargin President & CEO of Royal Medical.

Royal Medical is a world-class distributor of diabetes products with a concentration of easy to use products that provide the maximum benefit to our client’s patients.
